Access Portal
PRO

- **Intelligent:** intuitive, easy to use interface
- **Scalable:** unrivalled flexibility with one solution
- **Customisable:** tailor the system to your specific needs
- **Integration:** operates with a host of third party products

5,000 doors **125,000** tagholders

WHO SHOULD USE ACCESS PORTAL PRO?

The solution is ideal to meet the global needs of medium to large facilities, such as:

- Multiple site premises
- Educational institutions
- Offices and corporate environments
- Residential communities
- Government and parastatals
- Mining, oil and petroleum
- Health care facilities

PRODUCT BENEFITS:

- Free software upgrades
- Web-based interface for global availability
- Customisable reports
- One-click threat level actions
- Time and event triggered actions

Access Portal Pro provides you with superior control that is exceptionally capable, yet simple to configure.

The vast feature sets makes it one of the most flexible systems available and everything you need to manage and control your premises is quickly accessible within Access Portal Pro.

Along with user-intuitive processes and auto-hardware identification, the configuration and commissioning of Access Portal Pro can quickly be achieved, no matter the size of your operation.

Key features include threat control, which allows you to change the status of your premises with a click of a button so in an emergency you're able to respond in seconds.

Additional security features include dual tagging, which allows up to five tags, from any five authorised users, to be required for the opening of a door;

integrated third party biometric units; and the ability to read and write secure encrypted biometric data to SEOS cards on select SEOS enabled readers.

The dashboard provides the ability to personalise your working area to suit your specific needs - from an IP camera feed, to quick enrol or live transaction feed - you choose how you work best.

The system incorporates a powerful zoning tool for enhanced people movement control and, when coupled with the extensive reporting functions, enables you to quickly see what's happening on your premises.

The software also provides a wide array of standard reports, as well as the means for you to generate customised reports for single or multiple site management.
